

A two-day seminar on "Landslides and Land Subsidence in Hilly Areas: Causes, Prevention, Mitigation, and Restoration" was held in cooperation with The Institution of Engineers India, Himachal Pradesh State Centre, Shimla, on June 1-2, 2023.

The seminar is a great way to learn about new topics and meet the leaders who are constantly working, creating, and innovating various elements in the field of Geotechnical Engineering. Participants from several prestigious universities, including BIS, IIT Roorkee, GSI, Nagpur, CBRI Roorkee, and Wadia Institute of Himalayan Geology, Himachal Pradesh University, Shimla and among others, came together for this conference under the same slogan to discuss how to reduce the risk of landslides in the Himalayan region. Discussions focused mostly on:
