3. Please follow the stylistics adopted in this volume:
 - (i) Endnotes should be used only in case some explanation or supplementary information is to be given.

(ii) All references should be incorporated in the text parenthetically and a list of Works Cited should be given at the end.

(iii) In parenthetical references the last name of the author and page number should be given: no punctuation mark should be used before the page number. If the author is mentioned in the text, only the page number may be given. In case the list of Works Cited has more than one work by an author, brief title should be included before the page number if not indicated in the text: a comma should be used between the author's name and the brief title.

(iv) Titles of books, journals, websites and online databases should be italicised.

(v) Under Works Cited the entries should be arranged alphabetically by the last name of the author, as in a bibliography. In case of an entry with more than one author, only the first author's last name should be listed first; other authors' names be given in the normal order.

(vi) Entries for books should include: Name(s) of the author(s). Title (and subtitle, if any) of the book. Place and name of publisher, year of publication.
